## About Us

### About Us

Proudly apart of the Australian renewable energy movement, we provide and install solar on commercial and residential properties throughout Victoria and New South Wales.

We have organically grown over the years by building long standing relationships with customers and other solar providers. Now, with a number of strong installation teams and a wealth of experience and knowledge, we are happily expanding and growing with the industry.

Supported by a highly professional team of experienced electricians, our work is meticulous in design and execution, providing the best outcome and return possible for our customers.

**We don't want to be the biggest, we want to be the most reputable, the most trusted and respected by our staff, clients and other industry leaders.**

### Recent Commercial Installations

- VIC School: 160KW, 200KW, 500KW
- Storage Company: 355KW (total)
- Poultry Farm: 100KW
- Manufacturing Plant NSW: 160KW
- Water Authority: 100KW

### Our Values

All our solar systems are Clean Energy Council Accredited and backed by product and workmanship warranties.
